

# TTP-6HW

## 6 MODULE HIGH WIND AND SNOW POLE TOP MOUNT

**Mount 6 modules with a total area of 149 square feet or less  
on a 6-inch Schedule-40 or schedule-80 pole**

- 131.5-inch rails per column accommodate 6 modules with widths up to 41.5 inches
- Mounts on user-supplied 6-inch schedule-40 or schedule 80 steel pipe
- Module clamps fit frames between 30 to 40 mm deep\*
- No complex sizing documents or need to send module data sheets when ordering
- Heavy-Duty Steel structure and Tamarack 3.1 aluminum module mounting rails
- 0° to 60° tilt angle
- UPS Shippable
- Total shipping weight is 260 pounds in 6 boxes
- **Engineered for up to 140 mph wind speed and 100 psf snow load**

*\*Deeper module frames can be used by adding 50/50+ mounting clamp sold separately 89907*

TTP-6HW								
Maximum Snow Load (PSF) for up to 149 sq.ft. module area
